PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in **full-stack software development**, spanning across modern web technologies, backend systems, and **database design**. Built and deployed multiple end-to-end projects involving API integrations, intelligent data processing, and scalable web applications, complemented by industry experience contributing to production systems through a software engineering internship.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, Java, HTML5, CSS3
Frontend: React.js, Vite, Tailwind CSS, Zustand, TanStack Query
Backend: Node.js, Express.js, Django, Django REST Framework, Prisma ORM
Databases: PostgreSQL
AI & Integrations: OpenRouter (LLM APIs), Fuzzball (Fuzzy Matching), Server-Sent Events (SSE)
Developer Tools: Git, GitHub, Claude Code, Emergent, Netlify, Render

WORK EXPERIENCE

Software Development Engineering Intern Nov 2025 – Jan 2026
Rigzz Technologies | Kolkata, West Bengal

- Developed and reviewed code supporting the build and deployment of client-facing and internal software systems under the guidance of the Head of Engineering.
- Collaborated with cross-functional teams to translate requirements into scalable technical solutions within a live, production engineering environment.

PROJECTS

CVPitch | *AI-Powered Resume Analyzer & Mock Interview Coach*

- Built and deployed a full-stack platform for resume analysis and AI-powered mock interviews, supporting resume storage and job-specific evaluation workflows using React, Node.js/Express, PostgreSQL, and Prisma ORM.
- Integrated OpenRouter LLM pipelines with Server-Sent Events (SSE) to stream ATS scores, keyword gaps and personalized improvement suggestions in real time.
- Implemented resume parsing with the Affinda API and an interactive interview system using the Web Speech API for speech-to-text and text-to-speech capabilities.

FeastForecast | *Full-Stack Meal Planning & Pantry Management App*

- Developed and deployed a full-stack meal planning application using React, TypeScript, Node.js/Express, PostgreSQL, and Prisma, featuring pantry management and recipe organization.
- Engineered a fuzzy-matching ingredient system using Fuzzball to detect duplicate pantry entries and reduce database redundancy.
- Implemented secure authentication and automated grocery list generation with real-time synchronization between meal plans, pantry inventory and user preferences.

MonieGlitch | *Frontend Web Application*

- Designed and built a responsive expense-tracking application supporting full CRUD operations and real-time balance calculations without page reloads.
- Integrated the pdfmake library to generate and export formatted transaction reports directly from the browser.
- Created a mobile-first interface using modern CSS layouts and vanilla JavaScript without relying on external UI frameworks.

EDUCATION

Vellore Institute of Technology | Bhopal, India
B.Tech in Computer Science and Engineering, CGPA: 8.26/10 Sep 2023 – Present

Authpur National Model School | West Bengal, India
Indian School Certificate (Higher Secondary), 88.6% 2023

Authpur National Model School | West Bengal, India
Indian Certificate of Secondary Education (Secondary), 92.4% 2021

LEADERSHIP & EXTRACURRICULAR

Operations Lead, The Bengali Club Mar 2024 – Mar 2025
VIT Bhopal

- Directed end-to-end on-ground operations and logistics for club meetings and cultural events, coordinating across multiple stakeholders to ensure seamless execution.

Technical Core Member, iCreate Club Feb 2025 – Feb 2026
VIT Bhopal

- Coordinated technical setup and logistics for club workshops, hackathons and project showcases, managing digital assets for hands-on sessions.

CERTIFICATIONS

- Complete Web Development Course – Udemy (2025)
- SEBI Investor Certificate (2026)
